SUMMARY

Bernard is the Head of Civils and Structures for the Civil Engineering and Reinforced Concrete Structures Division within McGee Group. Bernard joined the company in 2012 and has progressed in this time from Project Manager to Senior Project Manager to Contracts Manager and on to Head of Civils & Structures.

Bernard is self-motivated individual with strong field management and cost management experience in both building structures and civil engineering projects. His focus is to manage labour and equipment with the assurance of a safe and quality-oriented project.

Bernard has an outstanding ability to direct a project team for quality assurance, craft supervision, material expediting, and all other project administration including planning, scheduling, health and safety, programs and purchase agreement administration. He has a strong practical and analytical approach to tasks together with a comprehensive knowledge of construction, materials technology, planning and safety as well as being personable and can relate to a wide range of people.

ROLE AND RESPONSIBILITIES

Bernard's role on the project will be to work closely with the Contracts Managers and Project Manager to ensure the safe and successful delivery of the works and maintain the client / contractor relationship.

Bernard will also oversee the detailed planning, delivery contractual administration, program delivery, financial control, and resource scheduling of the works on a day-to-day basis and interface with the Project Manager on the long-term planning and coordination issues. He will interface with the client team to ensure the requirements are brought together and delivered successfully.

RECENT WORK HISTORY

Bankside Yards West

Demolition, groundworks, service diversions, complex basement construction and superstructure works for Native Land's mixed use redevelopment scheme at Bankside Yards West adjacent Network Rail infrastructure.

UCLH Phase 4

Pile enabling works, kingpost & skin wall construction, underpins to surrounding structures, temporary works propping to spans of 60m, bulk excavation of 73,000m³, producing contract programmes & short term target programmes, managing plant & labour resourcing, managing budgets & forecasting.

Essex Waste Treatment Centre

Civils and concrete works in constructing a new household waste treatment facility in Basildon including bulk excavation, pile caps construction & raft foundations, basement slab construction, capping beam construction to contiguous pile walls, construction of pile bearing and ground bearing floor slab etc.

Storey Restaurant

Demolition of existing toilet block, sheet piled retaining structure & capping beam, excavation of basement, structural steel frame, compiling various RAMs for the different operations of the project, coordinated temporary works design for concrete structures, reinforcement call offs, produced target programmes, coordinated site team & oncoming sub-contractors.
