SUMMARY

Nick joined the McGee Group as Health and Safety Director with a breadth of construction knowledge. Prior to McGee, Nick worked for the Mace Group as a Health, Safety and Wellbeing Senior Business Partner. He had two key roles as firstly a central support

and secondly supporting a new operational business unit. In the central role Nick had responsibility for providing construction based expertise in the development of the health, safety and wellbeing strategy, management systems, bidding, education and technical support. His team included technical specialists who added value both in bidding stage and construction delivery. The new operational business unit was based on innovation in construction methods. Nick's responsibility was to establish the required processes such as annual delivery planning, reporting, risk management, governance and developing the excellent culture.

Immediately prior to joining Mace, Nick was employed by Skanska for 11 years. Initially as the Health & Safety Manager on the £1.2 billion Barts and The London Hospitals construction. On the back of the success at Barts & The London Nick was promoted. He managed a team of H&S professionals supporting construction projects around the UK in sectors such as schools, commercial offices, hospitals, pharmaceuticals, custodial and MoD facilities. Nick also was involved in developing Skanska's strategy, running campaigns and being responsible for the Health & Safety Management System.

Nick obtained Chartership of the Institute of Occupational Health and Safety in 1995. Educated as a Civil Engineer, Nick was involved in the construction of roads, bridges, tunnels and sea defences. Nick's career moved to building in both the commercial and public sector including stadia, residential, theatres, mechanical and electrical construction, and facilities management.

Nick has also had the opportunity to work within pan-industry groups to develop innovative solutions in lifting operations and plant & equipment.

ROLE AND RESPONSIBILITIES

As Health & Safety Director Nick has responsibility for overseeing the health and safety management at group level. Nick will work with the Health and Safety Managers and Advisors to ensure the project is fully supported. The team will work with the Client and project team to deliver the highest standards. This includes ensuring the aspects of training, reporting, safe systems of work, auditing, inspections and accident investigations are maintained. A key element of the role is the proactive approach to action from lessons identified and trends, running of campaigns and trialling industry innovation.

Nick is also a Deputy Rail Manager for rail operations for the company.
