### General Data Protection Regulation (GDPR)

This data is private and confidential and must not be shared with any third party without our consent. This data is shared with you on the basis that you have put in place measures to protect this information (such as limitations on transfer and retention policies). If that assumption is incorrect please notify us by return.

### SUMMARY

Ernesto joined McGee Group in 2012 and is an highly experienced project engineer.

Ernesto is an organised and self motivated individual, carrying out technical and supervisory duties on the different projects with experience in site setting out and mainly focused on movement monitoring both lateral and vertical of retained structures.

### ROLE AND RESPONSIBILITIES

Ernesto will be the Project Engineer and as such will have primary responsibility to all the site supervisors, engineers and operatives. Ernesto will be reporting directly to the project/contracts manager for the job on a daily basis. He is a team player and excellent communicator, creating a good environment for all to work in. He will control and ensure all aspects of the construction process including temporary works are well planned, administered, correctly resourced, of a high quality and above all "safe".

### RECENT WORK HISTORY

#### HM State & Royal Buildings

Extensive refurbishment and structural alterations works carried out on a Grade I listed Royal Building (due to strict NDA, unable to share more details).

#### Soho Place

Demolition of 17 and 19-23 Oxford Street over a live LUL Station including demolition of LUL temporary piles, pile caps, removal of infilled basements, backfill existing basements and pavement vaults, soft strip out.

#### Ludgate House

Demolition of 10 Storey existing building for Native Land in Southwark for the Bankside Yards West scheme. Scope included demolition, soft strip, enabling works, asbestos removal, weatherproofing and temporary works.

#### Portman Hotel

13-storey building of 20,199m2 GIA involved the refurbishment of and extension to the existing hotel to the north-west of Portman Square and transform the building and reposition it as a high-quality hotel.

#### 1-3 Grosvenor Square

Facade retention, demolition against a Grade II listed building and working embassy, soft strip, asbestos removal followed by Piling, basement box construction and superstructure works for an ultra-prime residential project in Mayfair, London.

#### Commonwealth House

Investigations, soft strip, demolition, cut and carve, drainage ducting, temporary works, facade retention

#### BBC Television Centre

Soft strip, asbestos, demolition of the central wedge area, Studios 4, 5, 6 and 7, the restaurant block, the drama block, including two 40 metre chimney stacks and the careful deconstruction of three Link bridge structures.
